What’s changed?

Google Developer Group

2019

Content can be only made by people

Google Developer Group

2019

Content can be only made by people

2025

Content can be made by language models

Google Developer Group

2019

Content can be only made by people

UX can only rely on graphical interfaces

2025

Content can be made by language models

Google Developer Group

2019

Content can be only made by people

UX can only rely on graphical interfaces

2025

Content can be made by language models

The most intuitive interface is a human language

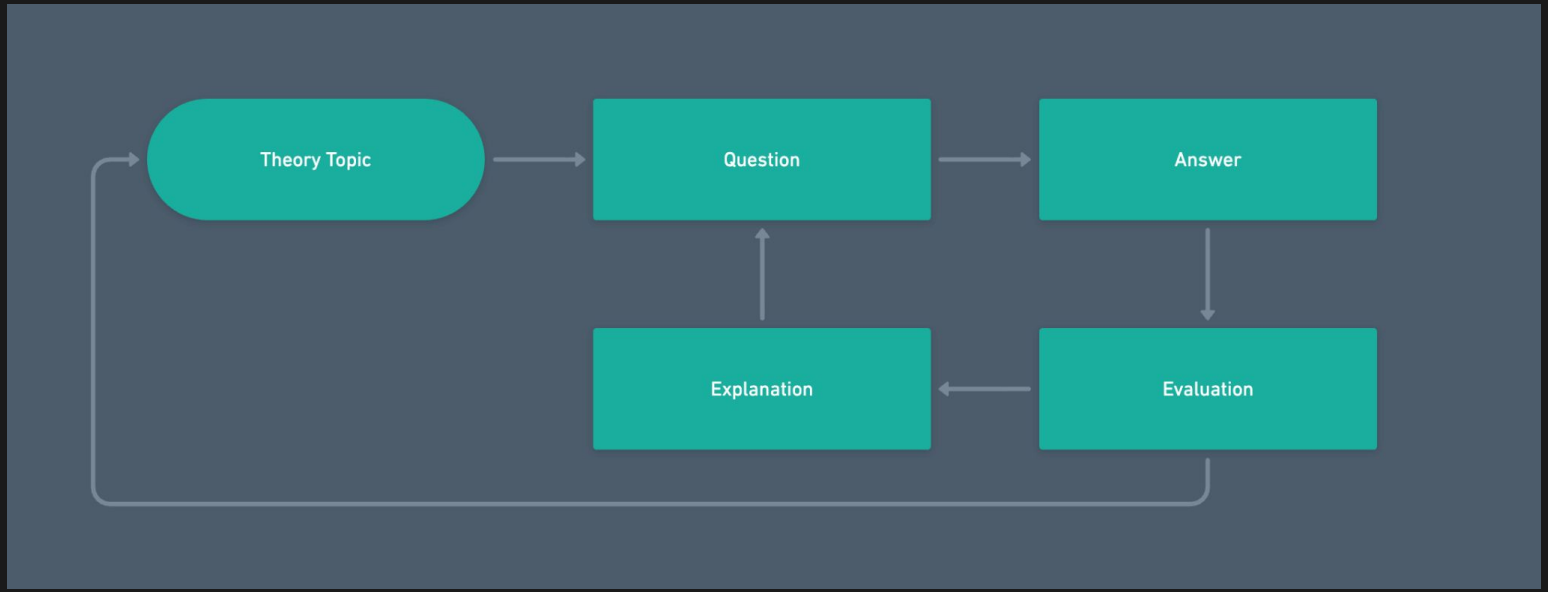

Google Developer Group

2019	2025
Content can be only made by people	Content can be made by language models
UX can only rely on graphical interfaces	The most intuitive interface is a human language

Google Developer Group

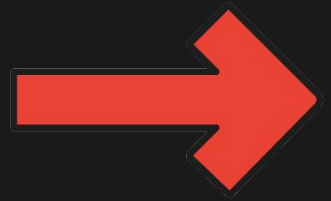

What is Snappy Loop

Google Developer Group

Choosing a right model

Google Developer Group

Generation of a language course

gpt-4o-mini cheap quick

Google Developer Group

Generation of a language course

gpt-4o-mini cheap quick bad

Google Developer Group

Generation of a language course

gpt-4o-mini	cheap	quick	below average

Google Developer Group

Generation of a language course

gpt-4o-mini	cheap	quick	below average
gemini-2.0-flash	cheap	quick	good

Google Developer Group

Generation of a language course

gpt-4o-mini	cheap	quick	below average
gemini-2.0-flash	cheap	quick	good
gemini-2.5-pro			very good

Google Developer Group

Generation of a language course

gpt-4o-mini	cheap	quick	below average
gemini-2.0-flash	cheap	quick	good
gemini-2.5-pro	expensive	slow	very good

Google Developer Group

Generation of a language course

gpt-4o-mini	cheap	quick	below average
gemini-2.0-flash	cheap	quick	good
gemini-2.5-pro	expensive	slow	very good

Google Developer Group

What's the difference

context window — smaller

Model	Context window (tokens)	Cost per 1M Output Tokens
Deep Seek V3	64k	≈ $0.28
GPT-4o mini	128 k	≈ $0.60
Claude 3.5 Sonnet	200 k	≈ $15.00
Gemini 2.0 Flash	~1 M	≈ $0.40
Gemini 3.0 Pro	~1 M	≈ $12.00

What's the difference

context window — smaller
reasoning depth — shallow

Model	Reasoning Depth (approx.)	Cost per 1M Output Tokens
Gemini 2.5 Flash	~ 6–10	≈ $2.00
GPT-5.1	~ 45–60	≈ $10.00
Gemini 3 Pro	~ 20–30	≈ $12.00
Claude 3.5 Opus	~ 55–70	≈ $75.00

Google Developer Group

What’s the difference

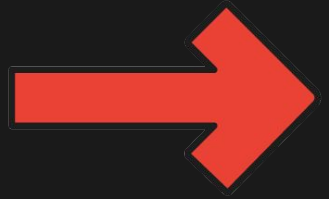

context window — smaller
reasoning depth — shallow
long-range coherence — weaker

Google Developer Group

Choosing a model made easy

Google Developer Group

OpenAI SDK usage

```
resp, err := a.openAI.Chat.Completions.New(
    context.Background(),
    openai.ChatCompletionNewParams{
        Model:    a.model,
        Messages: chatHistory,
    },
)
```

Google Developer Group

Gemini SDK usage

```
googleChat, _ := a.geminiClient.
    Chats.Create(ctx, a.model, config, history)
result, err := googleChat.
    SendMessage(ctx, *actualMessage)
```

Google Developer Group

Unified Adapter

```
type ClientAdapter interface {
    GenerateText(chat *ChatContext) (*Response, error)
    TranscribeVoice(voiceURL string) (string, error)
}
```

```
chat.AddSystemMessage(prompt)
chat.AddUserMessage(studentAnswer)

resp, err := llmClient.GenerateText(chat)
```

Google Developer Group

Feature-based model selection

Right conversation is a key

Google Developer Group

Prompt

Ask a question and give four possible answers.

Return a JSON with fields:
`question` — string,
`answers` — array of strings.

Google Developer Group

Prompt

Ask a question and give four possible answers.

Return a JSON with fields:
`question` — string,
`answers` — array of strings.

Result

Okay, here's a JSON example

```json
{
  "question": "...",
  "answers": [...]
}
```

feel free to ask more.

Google Developer Group

Prompt

! IMPORTANT !
return ONLY JSON

Google Developer Group

Prompt

! IMPORTANT!
return ONLY JSON

Result

```json
{
  “question”: “...”,
  “answers”: [...]
}
```

Google Developer Group

Prompt

! IMPORTANT !
return only JSON
WITHOUT any markup or
markdown around

Google Developer Group

Prompt

! IMPORTANT !
return only JSON
WITHOUT any markup or
markdown around

Result

✅

```
{
  “question”: “...”,
  “answers”: [...]
}
```

Google Developer Group

Prompt

! IMPORTANT !
return only JSON
WITHOUT any markup or
markdown around

Result

```
```json
{
  “question”: “...”,
  “answers”: [...]
}
```
```

Google Developer Group

Prompt

! IMPORTANT !
return only JSON without any
markup or markdown around

Code to trim 3 backticks

```
if strings.HasPrefix(text, "```json") {
    text = strings.TrimPrefix(text, "```json")
} else if strings.HasPrefix(text, "```") {
    text = strings.TrimPrefix(text, "```")
}
```

Google Developer Group

Prompt

! IMPORTANT !
return only JSON without any markup or markdown around

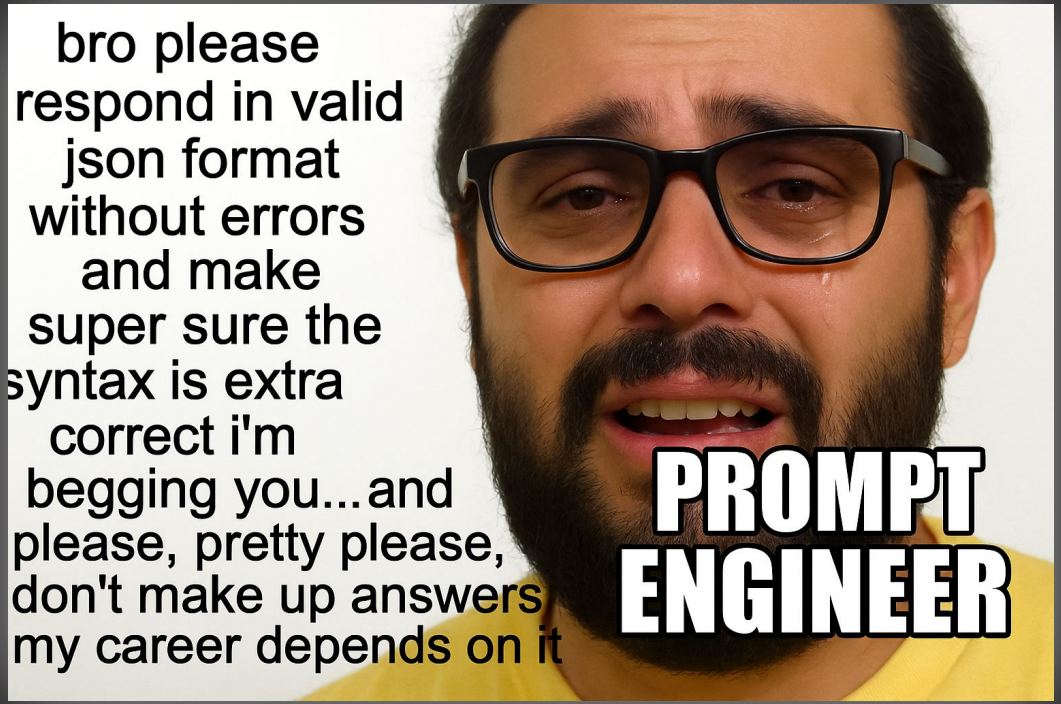

Code to trim 3 backticks

Result (two backticks)

``json
{
 “question”: “...”,
 “answers”: [...]
}
``

```
if strings.HasPrefix(text, "```json") {
    text = strings.TrimPrefix(text, "```json")
} else if strings.HasPrefix(text, "```") {
    text = strings.TrimPrefix(text, "```")
}
```
