Prometheus

But did we make reliability a shared priority?

How to set SLOs, drive improvement, and make friends with business stakeholders

Maxim Schepelin
Engineering Manager at Booking.com

Why is it hard?

If we could deliver business features first,
that would be great.

How much do we lose if our services go down for one hour?

01. Define your Service-Level Objectives in business terms

X must be true Y
percentage of the time.

Common availability numbers

Availability	Downtime per day	Downtime per year
99%	14.5 minutes	3.5 days
99.9%	1.5 minutes	8.5 hours
99.95%	43 seconds	4.2 hours
99.99%	9 seconds	52 minutes
99.999%	< 1 second	~5 minutes

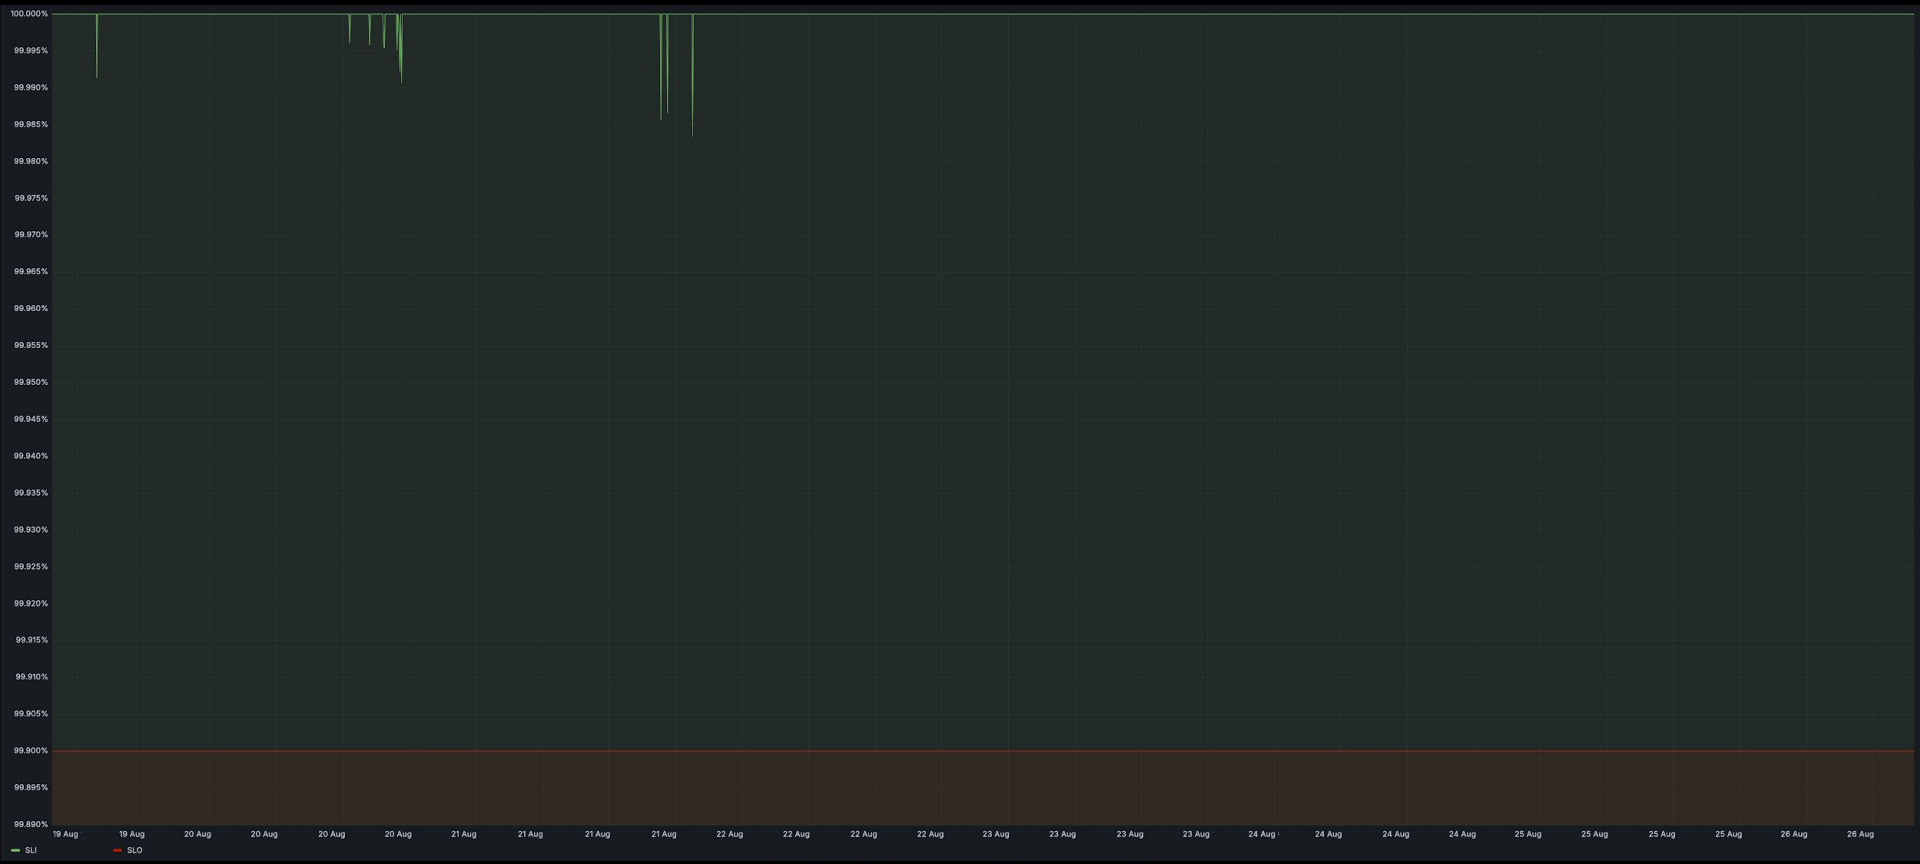

From: https://uptime.is

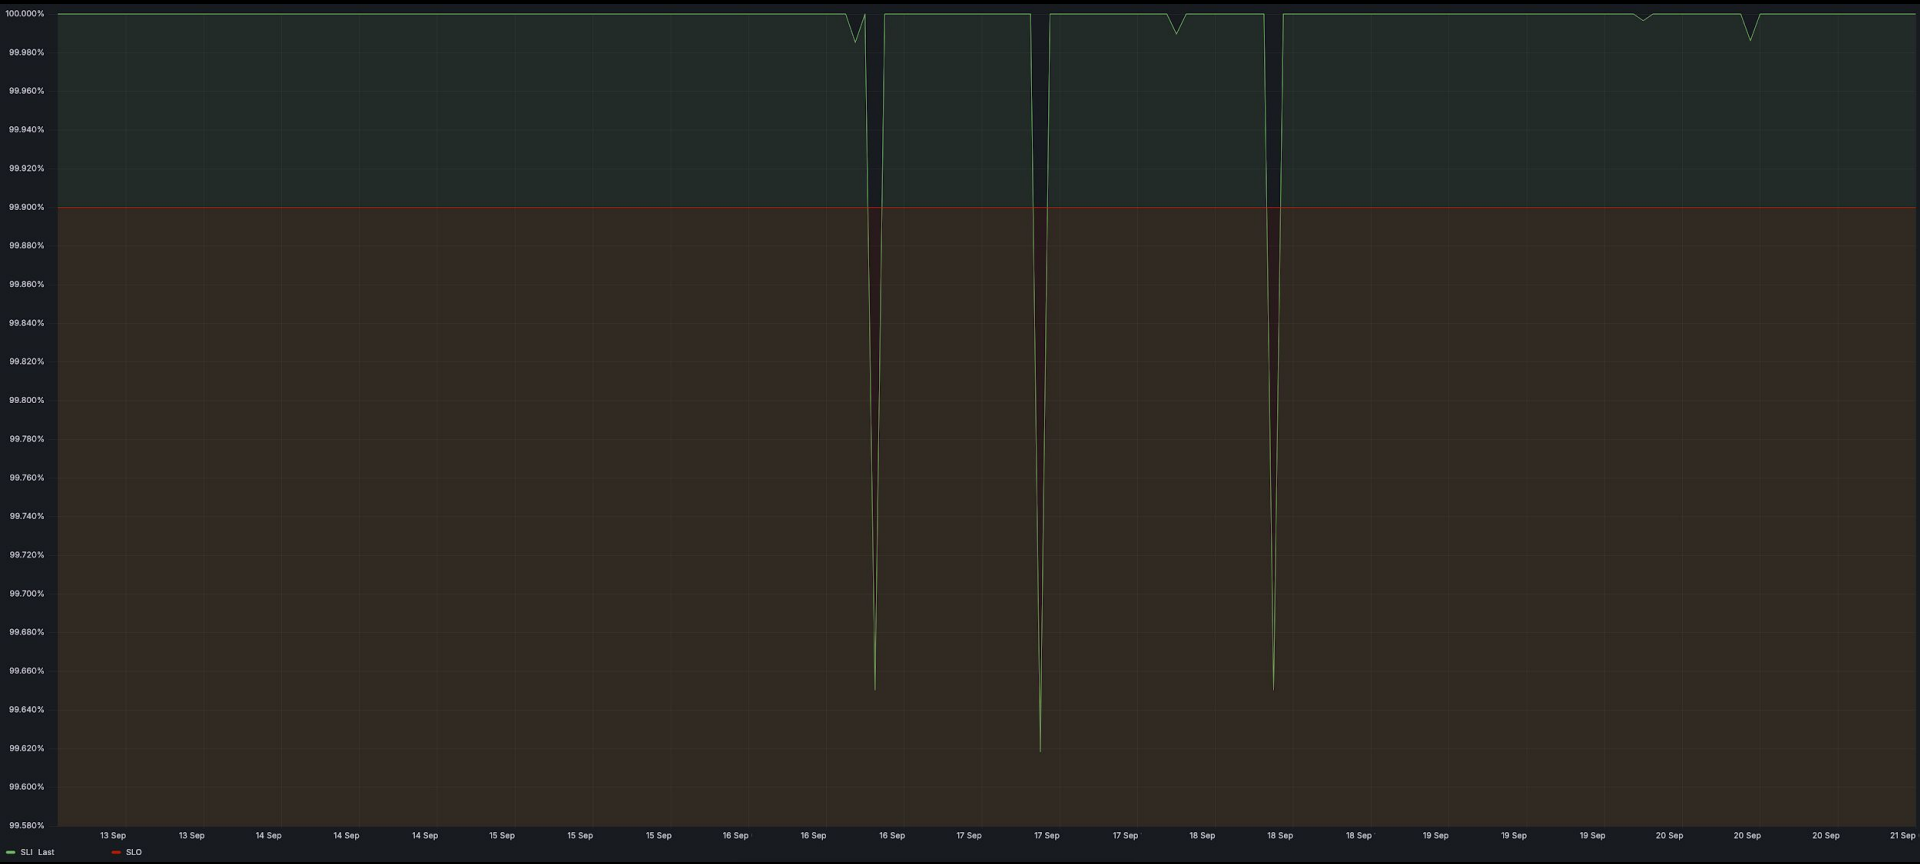

02. Define how you calculate the cost of an outage

Week over week comparison shows the impact

03. Report how your systems perform against SLO

SLO

MAKE RELIABILITY A SHARED PRIORITY

Step 01

Define SLOs in business terms

- → Move beyond the technical level
- → Connect SLOs to the business metrics
- → Measure if your systems are doing what they're supposed to

Step 02

Agree on how to estimate the cost of an outage

- → Apply the same approach to every outage
- → Use business metrics to measure the value of technical improvements
- → Prefer simple approach over complicated like WoW

Step 03

Report how your systems perform against SLOs

- → Share weekly updates with business stakeholders
- → Highlight business impact
- → Pinpoint major factors for SLO violations.

THANK YOU

Any questions?
