MCP is the new REST

Making MCP Typeform's new API

Andy Kuszyk

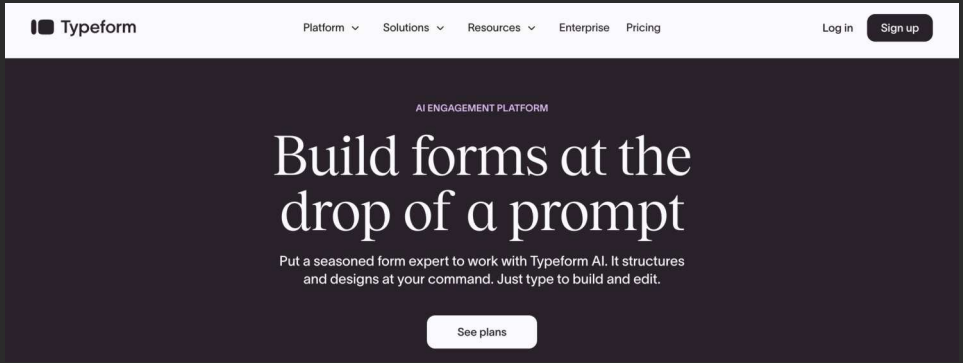

Introductions

👋 Hi, I’m Andy

Introductions

🏠 I'm a Staff Engineer at Typeform

Introductions

😎 I’m a fan of Back to the Future 🔥

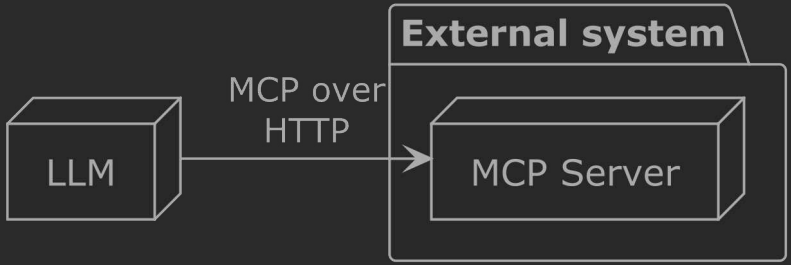

Wait, what's MCP?

- Most Creative Professional?
- Meme-filled, Cool Presentation?
- Model Context Protocol?

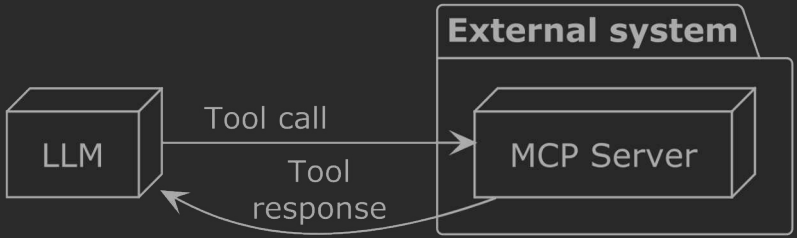

Wait, what's MCP?

Wait, what's MCP?

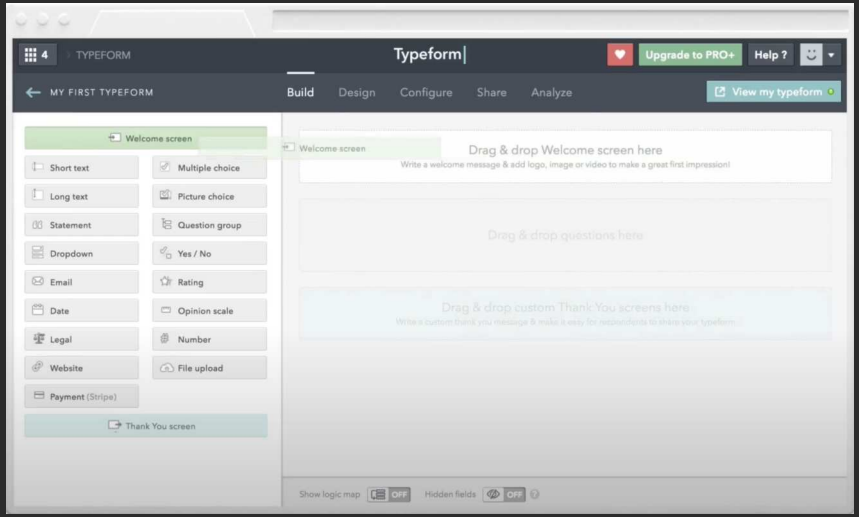

Wait, what's MCP?

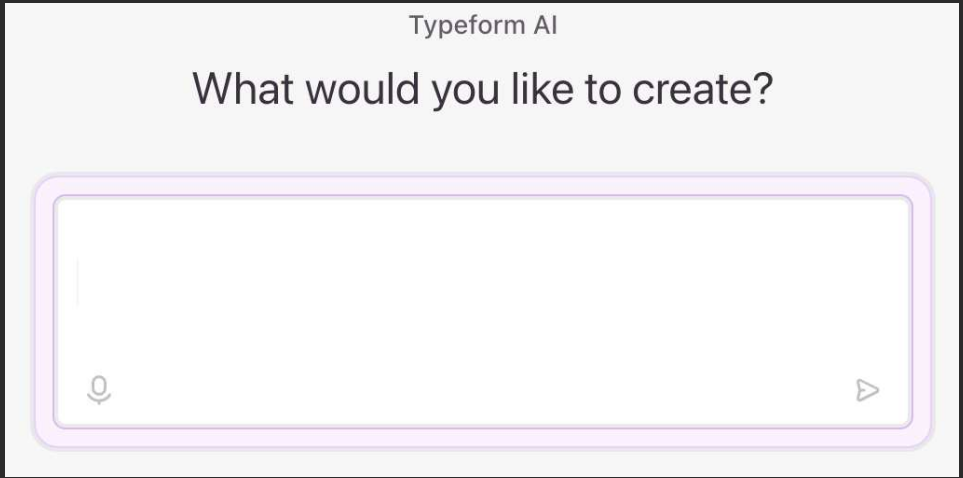

Agenda

1. What's changed in UX
2. The problem with REST
3. A taxonomy of tools
4. Making every team an MCP team

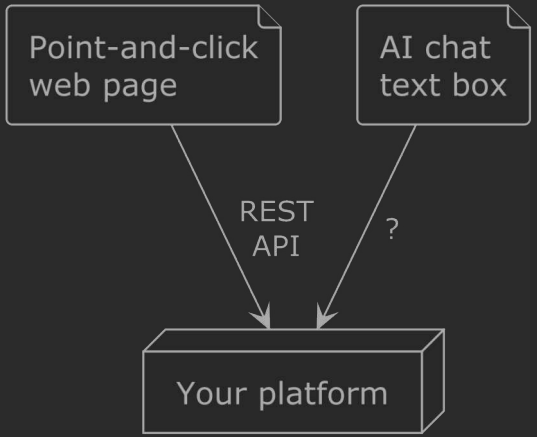

What's changed in UX > Last year

What's changed in UX > This year

What's changed in UX > Textboxes are the new buttons

Agenda

1. ~~What's changed in UX~~
2. The problem with REST
3. A taxonomy of tools
4. Making every team an MCP team

The problem > REST APIs

```
{
  "title": "double pepperoni with extras",
  "toppings": [
    { "type": "meat", "value": "pepperoni"},
    { "type": "vegetable", "value": "jalepenos"}
  ],
  "sauce": "bbq",
  "base": "deep pan",
  "crust": {"type": "stuffed", "filling": "cheese"}
}
```

The problem > REST APIs

The problem > REST APIs

An LLM needs tools that model a user's actions:

1. `start_pizza_order`
2. `add_topping`
3. `choose_sauce`
4. `choose_crust`
5. `finish_pizza_order`

The problem > LLMs model users

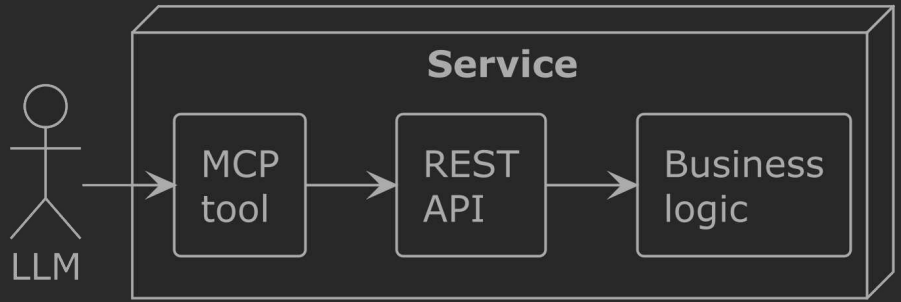

The solution > MCP is the new REST

LLMs use products like a human would–they need a human-centric API

Agenda

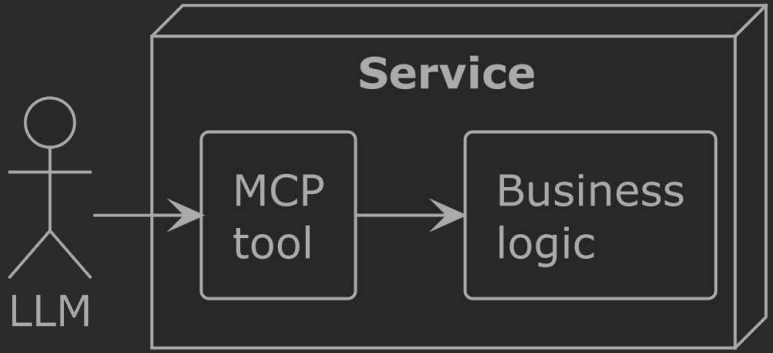

1. ~~What's changed in UX~~
2. ~~The problem with REST~~
3. A taxonomy of tools
4. Making every team an MCP team

- CRUD tools *(start an order)*

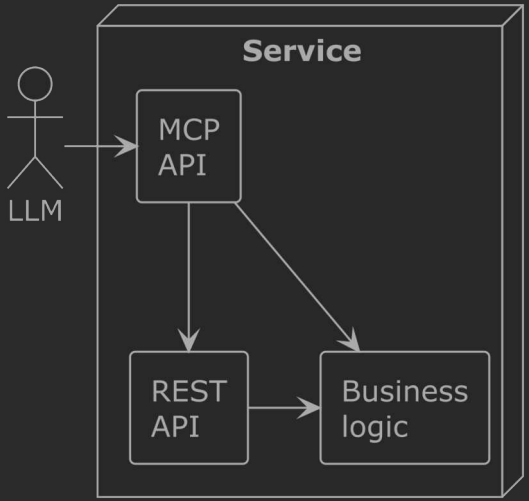

A Taxonomy of Tools

- CRUD tools *(start an order)*
- Domain-specific tools *(add a topping)*

A Taxonomy of Tools

Agenda

1. ~~What's changed in UX~~
2. ~~The problem with REST~~
3. ~~A taxonomy of tools~~
4. Making every team an MCP team

MCP teams

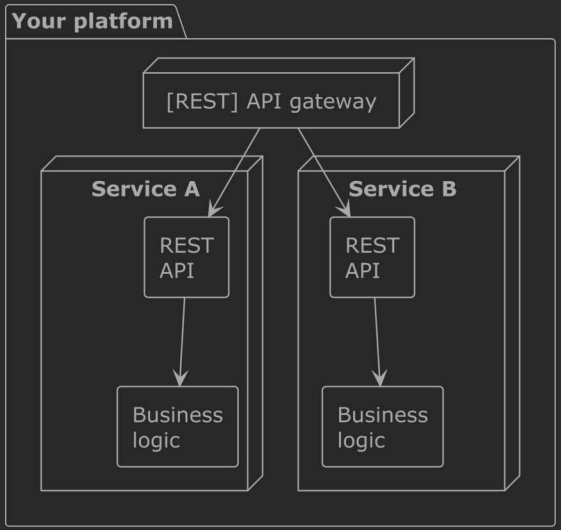

MCP teams

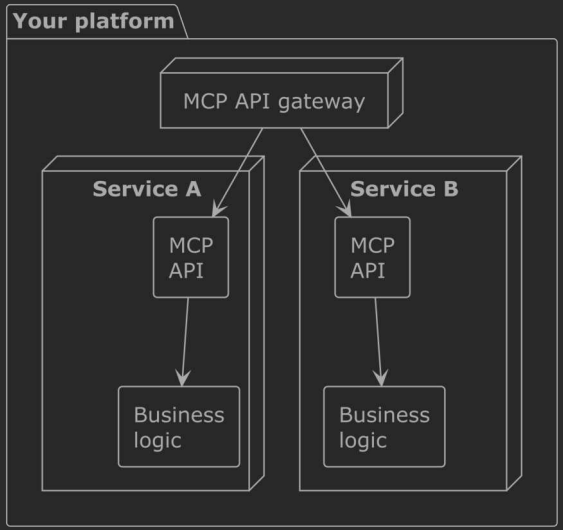

MCP teams

1. A common architectural vision
2. Shared tooling

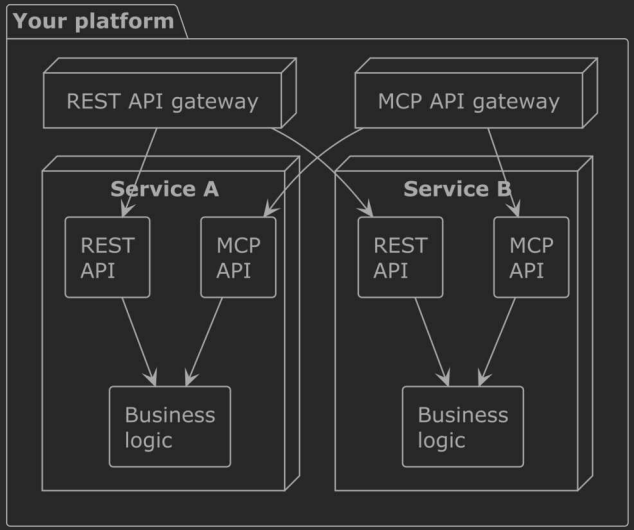

MCP teams > A common architectural vision

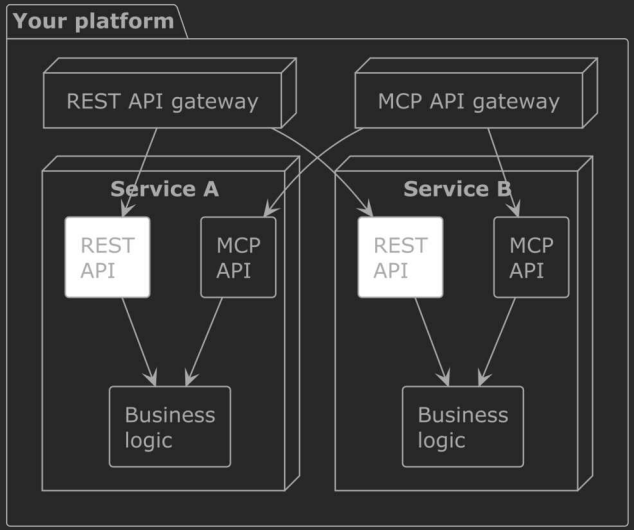

MCP teams > A common architectural vision

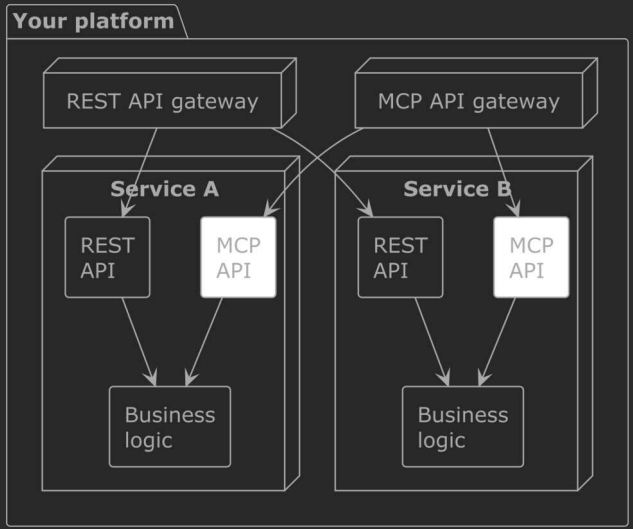

MCP teams > A common architectural vision

MCP teams > Shared tooling

MCP teams > Shared tooling

Agenda

1. ~~What's changed in UX~~
2. ~~The problem with REST~~
3. ~~A taxonomy of tools~~
4. ~~Making every team an MCP team~~

MCP is the new REST

- For LLMs, MCP is the new REST

MCP is the new REST

- For LLMs, MCP is the new REST
- REST is here to stay *(as long as we have JavaScript clients!)*

MCP is the new REST

- For LLMs, MCP is the new REST
- REST is here to stay *(as long as we have JavaScript clients!)*
- Every team can be an MCP team
